

Powder Coatings Product Guide

Movac's metal coatings division, vernicci, supplies a fully comprehensive range of wet paint coatings for the metal painting industry, from traditional Alkyd based technology through to high technology two component coatings which can be applied direct to a multitude of substrates, and also water based coating solutions.

Colour is available in all the ranges we supply, from numerous standardised paint charts to bespoke matches for customised projects to suit all your requirements.

Our range of high performance coatings are manufactured from our coatings blending systems supplied by our three supply partners: Axalta Coating Systems, HMG and vernicci.

A new addition to our portfolio is a complete range of powder coatings from our supply partner HMG.

HMG Powder is available in a multitude of various colours, including RAL & British Standards, and various finishes across Epoxy, Epoxy Polyester and Polyester powder types. This range of Powder Coatings gives consumers & businesses one of the most economical, long lasting and most colour durable quality finishes available.

Movac are multi-faceted, we have three divisions :

Automotive Finishes - Movac have a significant automotive division with 16 field-based Sales Executives. We deal with nearly all of the global paint brands. We supply paint equipment and consumable products to bodyshops who repair cars and commercial vehicles.

Industrial Finishes - Movac have a specialist metal coating division supplying paint to the industrial market. Our paints end up, for example, on machinery, digger buckets, wheelchairs, huts and storage tanks all over Europe.

Wood Finishes - Movac have become specialist suppliers in the wood coatings market. We have products that are suitable for all types of timber used in the industry. We supply wood finish products for interior and exterior as well as fire retardant, hygienic, child safe and waterborne products to name a few. We have 16 field-based Industrial Sales staff, all of whom have come from the industry.

Movac's success in the industry has come from a determination to be the best for your business and to give you the right solution for you at that time.

Movac's product portfolio is extensive, keeping pace with the needs of our customers and the ever improving technologies, not to mention the demands of legislation.

Our services include:

The Movac Group philosophy is to supply the best available products and technology at a fair price to its valued customer base and, to this end, we align ourselves with the highest quality manufacturers within their selected fields. To accompany the products that we supply we also provide a wide range of additional services to our customers.

As business grows, Movac adapts to the changes of the market place, the needs of our business, customers' businesses, environmental issues, technical innovation, suppliers advice and many other issues. In fact the only constant thing in our business is this change, in order to keep pace, Movac has been at the forefront of service offer and support to its customers.

Services that are available to Movac customers:

- Free, regular, daily delivery service of your products (regardless of quantity) to your business within our trading area.
- A regular call from our highly experienced, technically skilled Industrial Sales Executives.
- Full application system planning advice, regardless of complexity including spray and drying area analysis with temperature and relative humidity profiling.
- Sprayshop and extraction planning including product recommendation and spray booth / coating plant installation.
- Environmental Protection Act and Solvent Emissions Directive advice, planning and product sourcing & implementation along with full comprehensive VOC analysis computer printouts.
- Advice on industry legislation such as BREEAM, Process Guidance Notes, etc.
- Fully licensed waste management facilities available.
- Fully interactive health and safety website for customers, including access to industry consultants and data storage of created documentation.
- Access to the industry's leading manufacturers, ensuring customers are kept up to date with worldwide innovations and backed by the best facilities for problem solving.
- The latest spectrophotometer colour matching facilities enabling us to provide colour to your specifications in both small and large amounts with a level of consistency that will impress.
- Customer specific specifications created along with the option for BM TRADA Q-Mark certified prepared panels and assistance towards customer accreditation.
- Bespoke created formula and database creation for customer computerised mixing machinery.
- Custom designed fax or email order forms for customers to enhance product identification and ease order placement.
