- MBS011 - Rosewood

Natural ash

Natural Ash was the substrate used as a base for all the stains shown in this brochure.

- The colours shown must only be considered as indicative, since the final shade will depend on: type of substrate, type and quantity of added thinner and binder, application system, quantity of stain applied and type of coating applied on the stained timber.

Please note

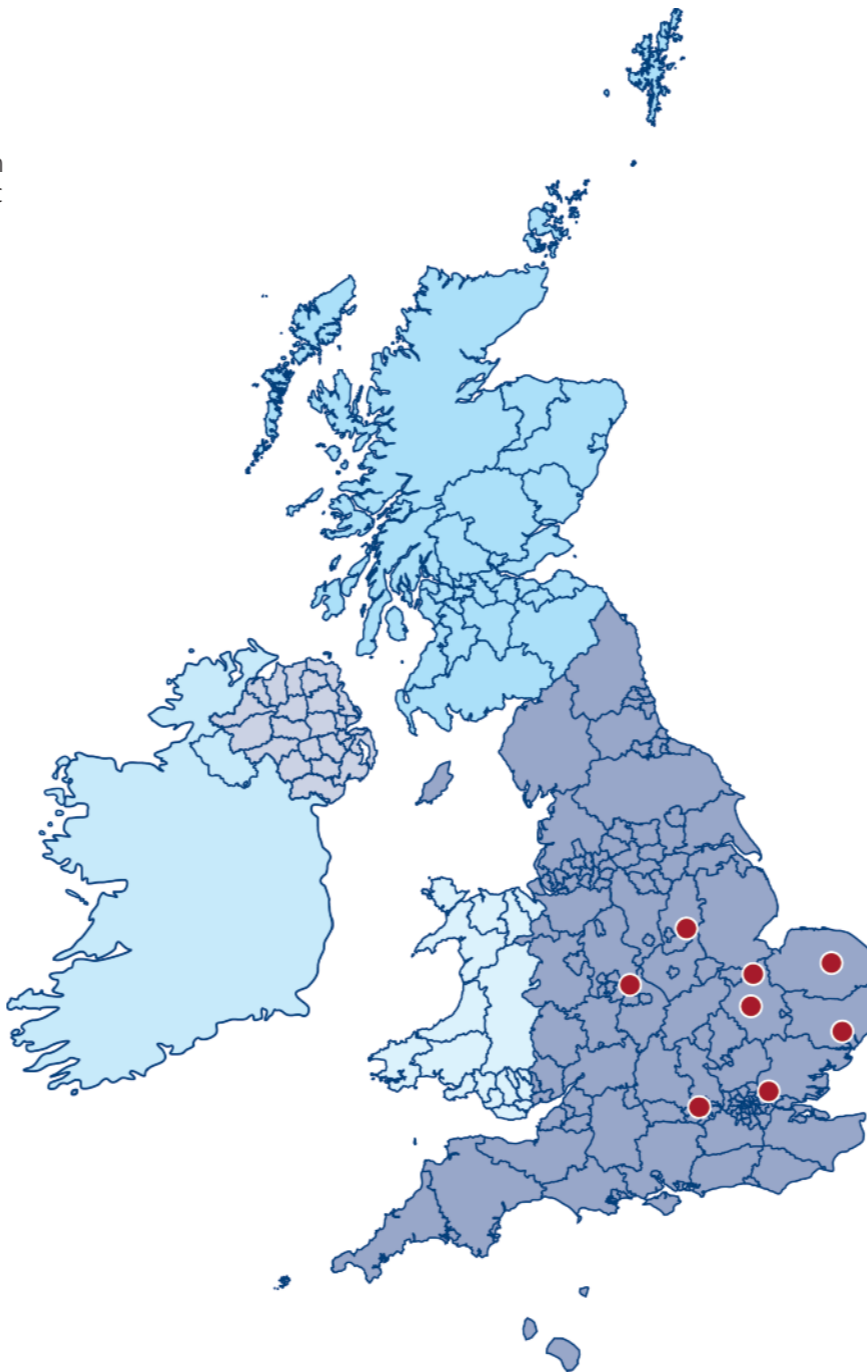

- Colours must be matched under natural daylight and the final shade must be assessed only after the coating system has been applied.

- Suitability of a stain to specific requirements, such as the method of application or compatibility with the coatings system used, must be evaluated by the end user.

High quality interior stains for a high quality finish, water and solvent based ranges

Sayerlack is a brand of *SHERWIN-WILLIAMS*

Movac - the UKs largest distributor of Sayerlack wood coatings.

High quality stains for a high quality finish from a high quality distributor!

SOLVENT BASED STAINS

XM 7100: Solvent based concentrated stains for general purpose, to be applied directly on bare wood after dilution. Good harmonizing effect. Suitable for panels, fitted furniture, doors etc.

Pastel colours can be obtained by blending XM 7100/13, White stain, with another XM 7100 stain of the desired shade.

Application method: spray.

XC 1900: Solvent based concentrated stains specially recommended for tinting polyurethane and nitrocellulose coatings, for staining/harmonizing purposes. They may also be used as shading stains (spray colours) between basecoat and topcoat.

Application method: add from 0,5 to 4% into basecoats or topcoats according to the colour desired.

WATER BASED STAINS

AC 1810: Harmonising stain, harmonising effect on uneven woods, can be diluted with water and alcohol.

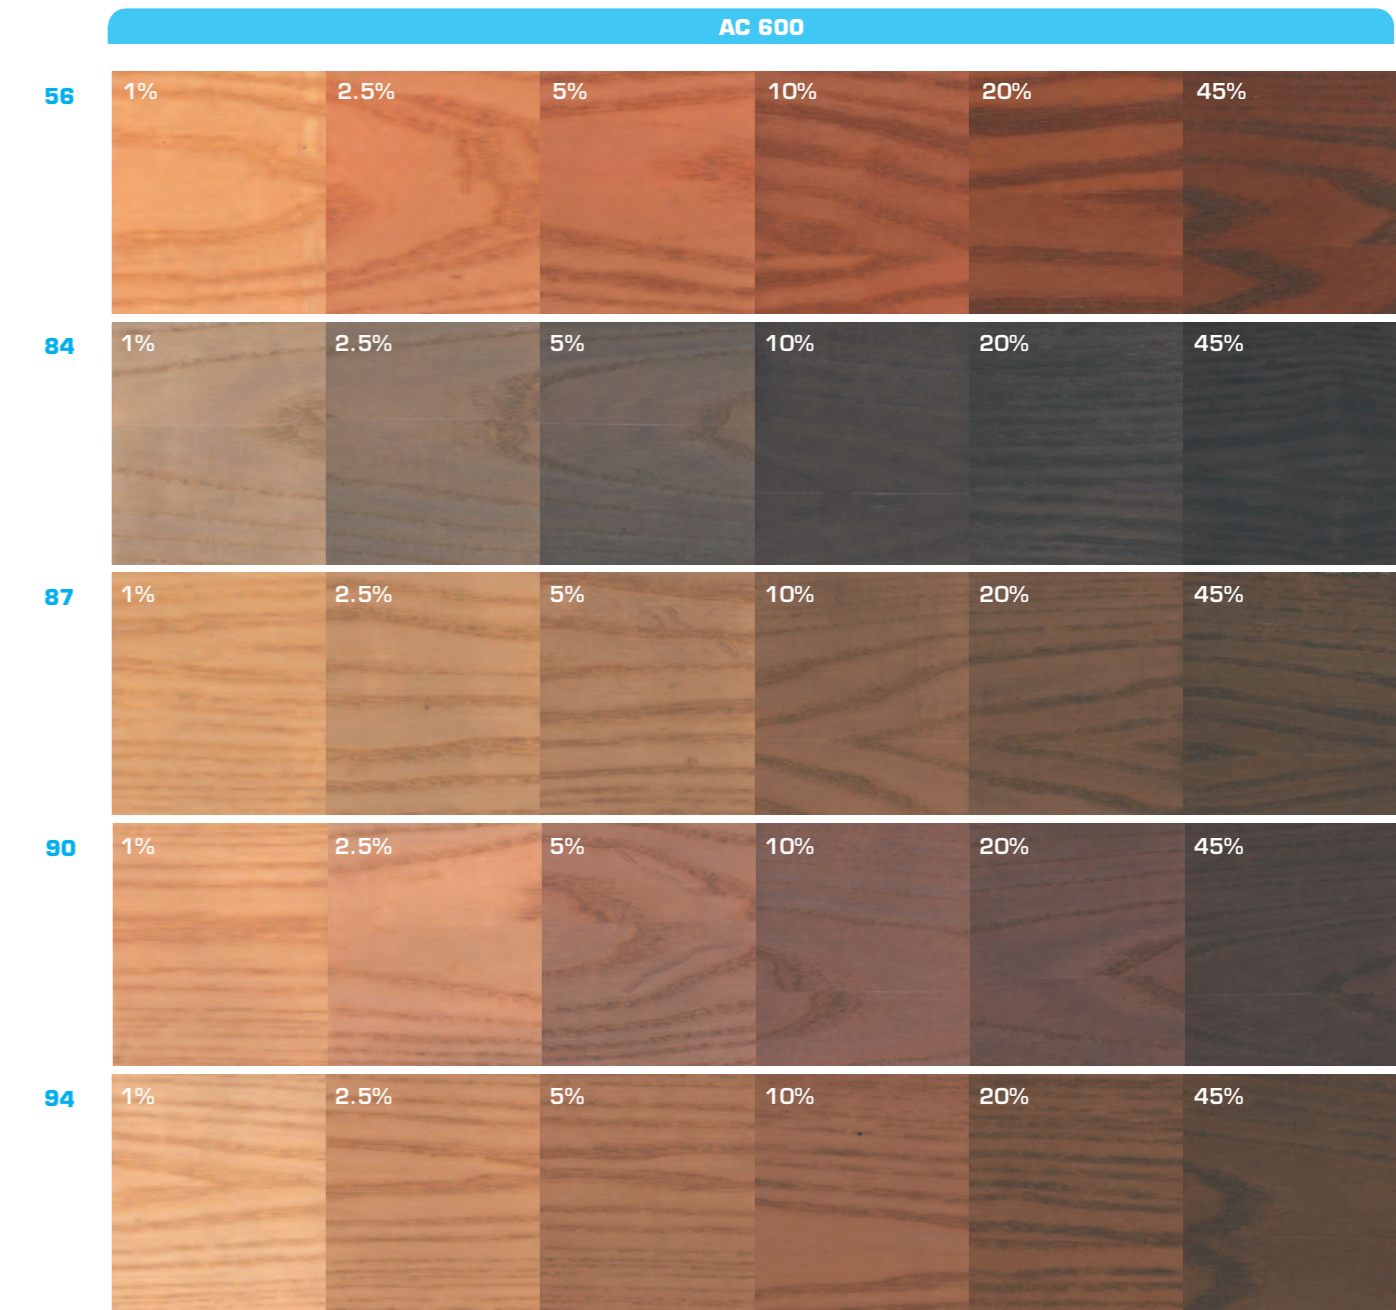

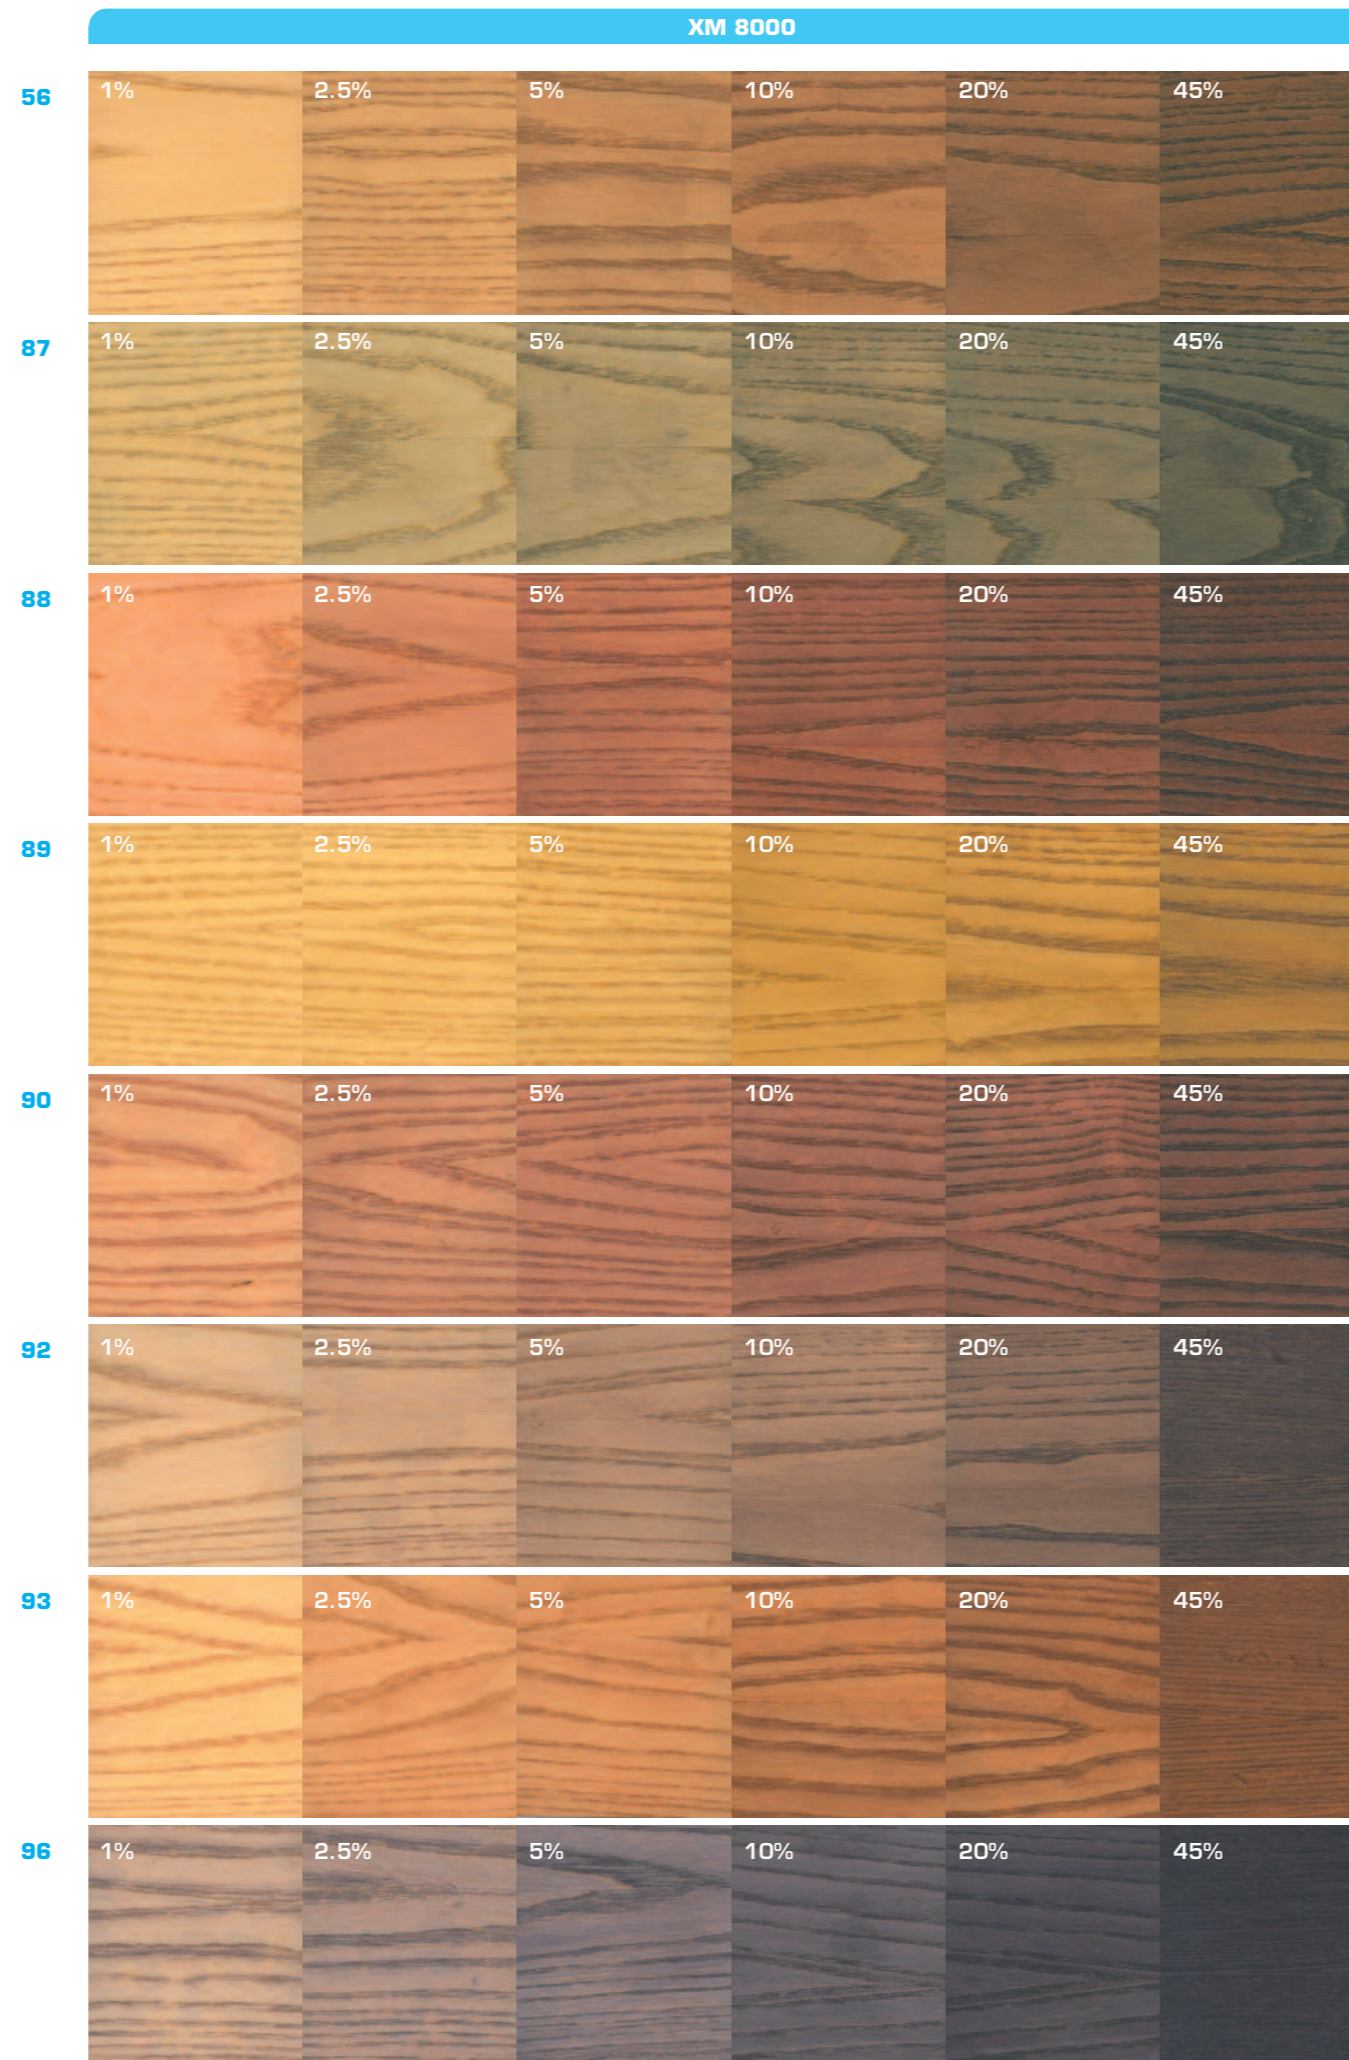

Can be overcoated with water and solvent based lacquers.

Application method: automatic and manual spray guns, dipping (with proper binder).

WATER BASED STAINS

AC 2110: Harmonising stain, can be diluted with water, acetone or alcohol, harmonising effect on uneven woods and improves grain marking. Can be overcoated with water and solvent based lacquers.

Application method: spray guns, dipping, roller or brush and wiping.

XM 8000 AND AC 600 RANGES

The product codes listed here are supplied in concentrate form and can be diluted as shown on the colour examples above. Stains from each range can be intermixed for individual colours as required.
