

TEXTURED FINISHES AND EXTERIOR EMULSIONS

TEXTURED FINISHES AND EXTERIOR EMULSIONS

A highly flexible coating, suitable for wood, plaster and brick, Sayerlack textured finishes and exterior emulsions can be used both internally and externally, with a guaranteed 10 years durability and an expected 40 year service life. The finishes are highly resistant to mould and algae growth and are ideal for bridging hairline cracks and minor surface irregularities. Application by roller, trowel, brush or spray, in a wide range of colours and textures, the product is complemented by a wide range of exterior and interior wood finishes and special effect products from the Sayerlack furniture coatings and industrial joinery ranges.

F1659 TEXTURE FINISHES

- Will give guaranteed 10 years durability and an expected 40 year service life, when used according to the specification.
- Highly resistant to mould and algae surface growths.
- Can be worked while wet to give a wide range of decorative textures.
- Ideal for bridging hairline cracks and minor surface irregularities.
- Available in a range of 10 standard colours. Other colours available on request.
- Highly resistant to cracking at uPVC window and door joints.
- Can be overcoated with F2212 exterior emulsions.
- Upgrades timber substrate to Class 2 Surface Spread of Flame (BS476 part 7).
- Maintains Class 1 Surface Spread of Flame on Class 1 board (BS476 part 7).
